Percentage – 84%
-

PROJECTS

- **IT Company Website | Link: - www.peakprosys.com**
Technologies – PHP, MySQL, HTML, CSS, Bootstrap, JavaScript
 - Developed a dynamic website for a software company that provides programming courses, business resources, and entrepreneurship development programs. The platform allows users to explore various courses, access business activities, and engage with entrepreneurship materials. The website is powered by PHP and MySQL for seamless data management, with a responsive design achieved using HTML, CSS, Bootstrap, and JavaScript.
 - **Student Management System | Technologies - Spring Boot, SQL**
 - The Student Management System is developed using Spring Boot for the backend and SQL for database management. This system allows users to create, read, update, and delete student records efficiently. It provides a seamless way to manage student information, track academic progress, and maintain an organized database for educational institutions.
-
